

Missouri RAC
FY 2018 County Cost-Share Allocations
Funded by the Kansas Water Plan

Dave Jones, Water Quality Program Manager
Division of Conservation

Program Development Basic Steps

- CD develops/approves local program
 - Selects Project Types
 - Eligible practices & associated components
 - Update county average cost for components
 - Set Landowner and Project limits – Maximum of \$10,000
 - Update Ranking Worksheet
 - Water Quality resource based criteria
- CD submits district program (CS-2) and Ranking Worksheet for DOC approval

Program Implementation

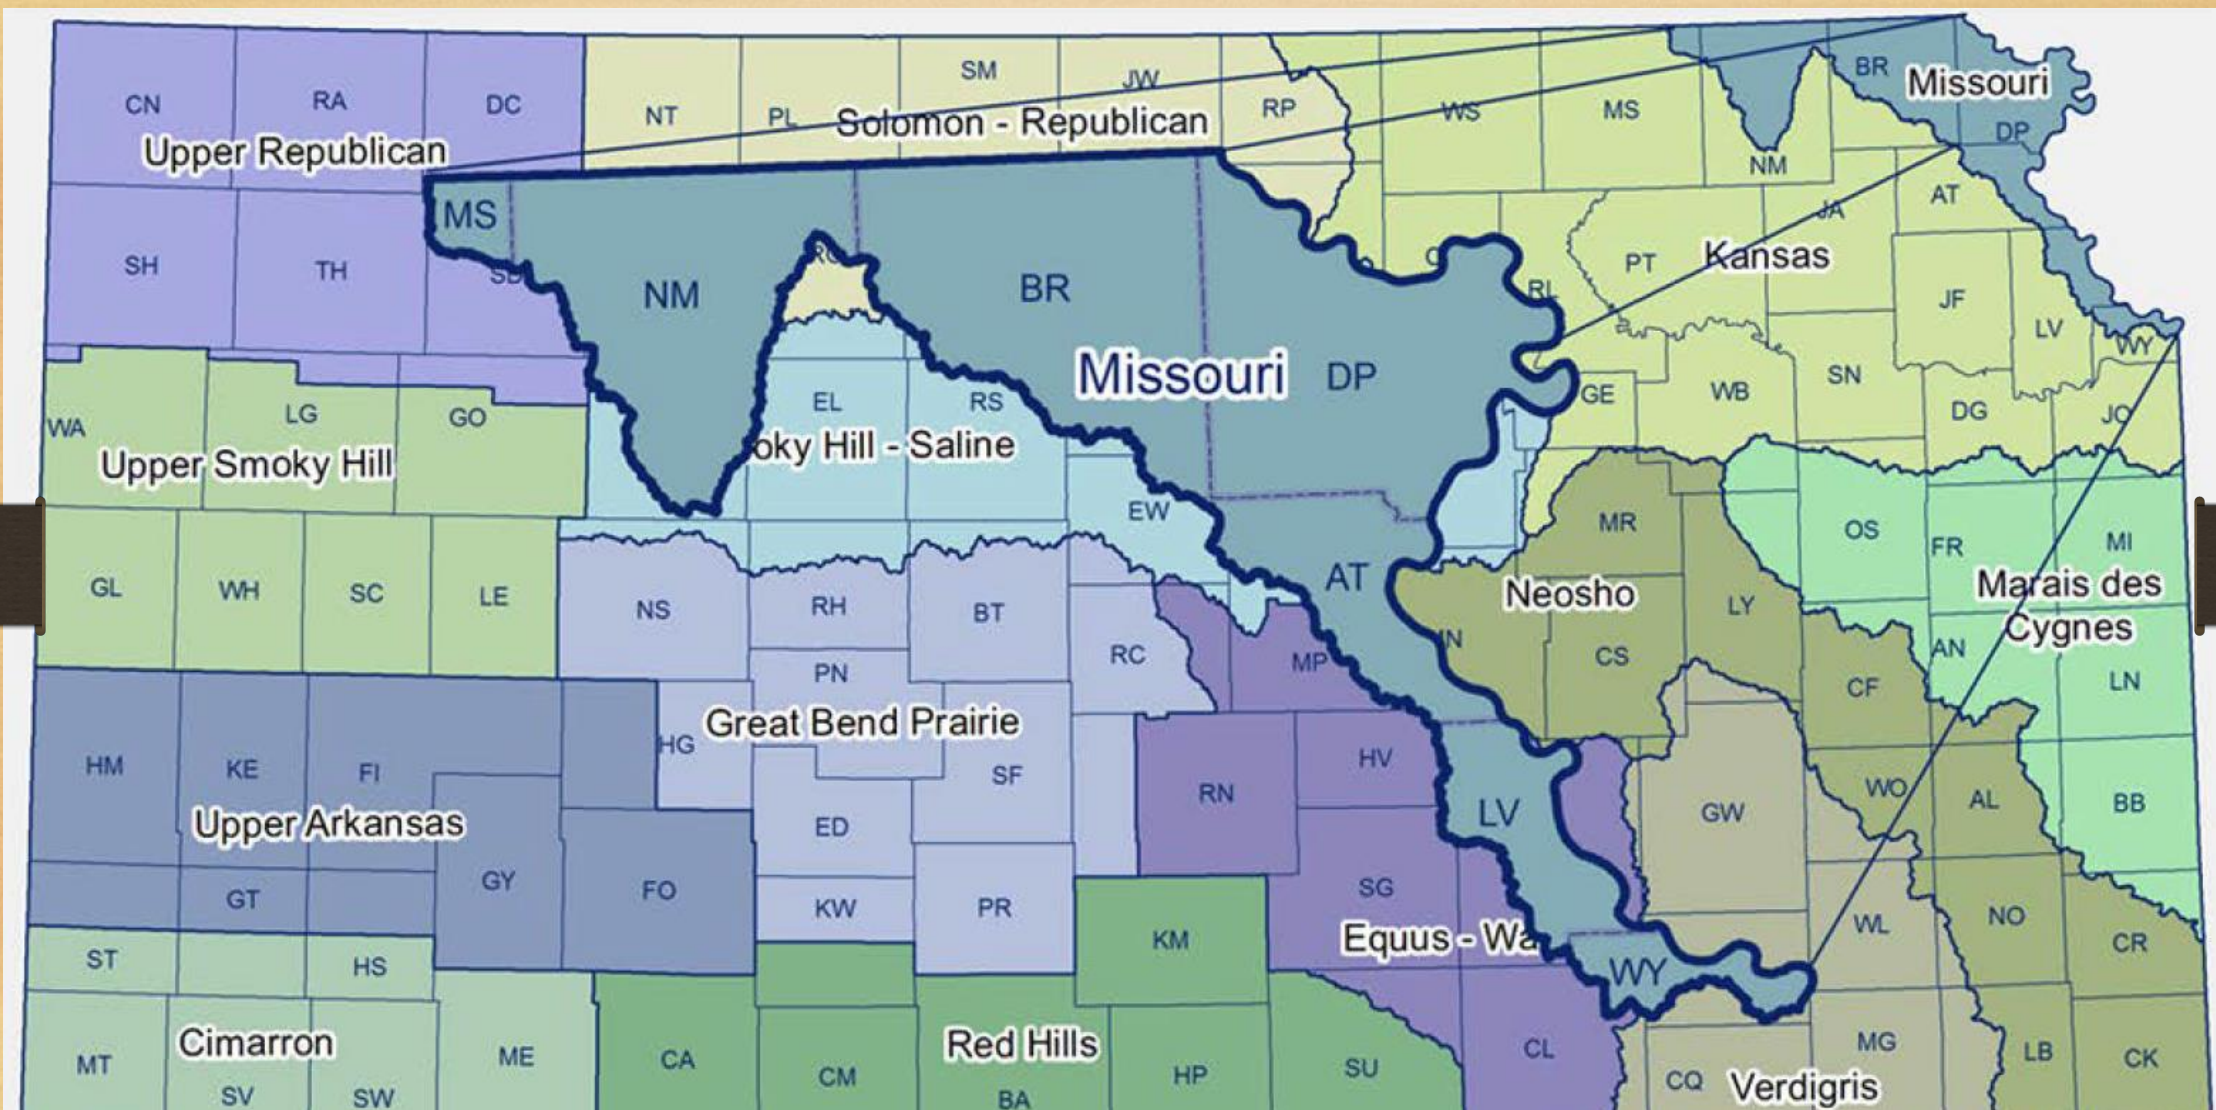

- CD designates a sign-up period (must have one)
 - DOC recommends minimum of 2 weeks
- CD publicizes sign-up period countywide
 - Newspaper(s), Newsletter, Radio
- Accepts applications for cost-share
- Evaluates proposed projects (NRCS)
 - Eligibility
 - Determine practices and cost estimates

Program Implementation

- CD prioritizes project requests using Ranking Worksheet
- CD board approves applications
- CD submits contract(s) to DOC for approval
 - Landowner may not start project until DOC has approved the contract

FY 2018 Program Year Considerations for Conservation Districts:

- It may be time to consider updating your county ranking worksheets.
- County NPS plan, Kansas Integrated Water Quality Assessment, WRAPS 9 element plans are all tools that can be used when updating local priorities.
- These tools can assist the district supervisors in identifying high priority HUC 12 watersheds.

**Recommended Allocations Approved
by the State Conservation
Commission on April 10, 2017**

County	FY 2018 NPS Base Allocation
Atchison	\$11,610
