

Municipal Water Project Planning & Implementation in Unprecedented Times

Introductions

Brian Meier

Jake White

The Importance of Planning

Recognition of a **Risk** or **Need**

Reactive

- Wichita Falls

Proactive vs
Reactive

Proactive

- Hays
- Garden City

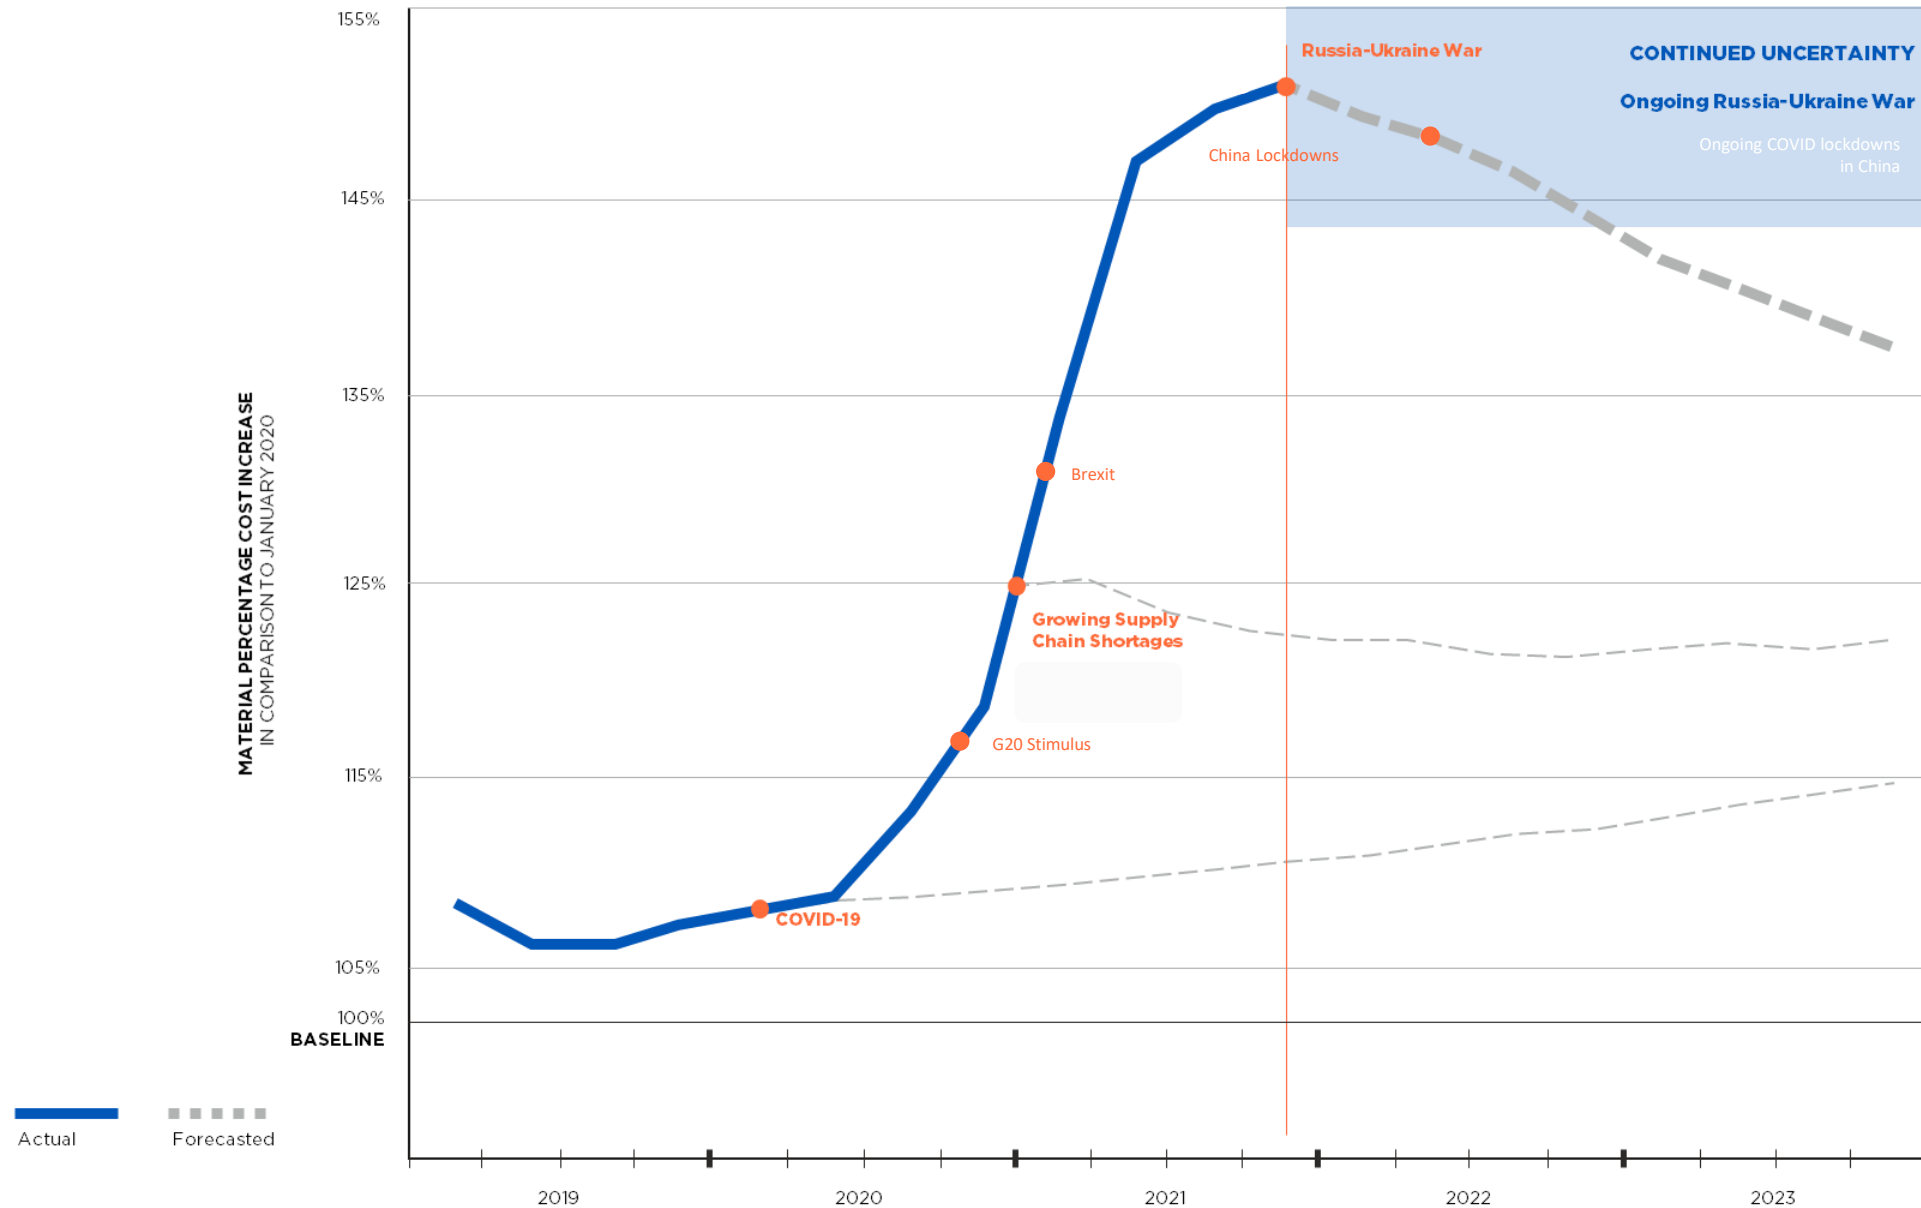

**What is
“Unprecedented”?**

Unprecedented Times

- Drought
- Declining Groundwater Levels
- Sedimentation
- Cost Escalation & Interest Rates
- Supply Chain Disruptions
- Changing Regulations

Unprecedented Times

Secure Your Future

Maintain flexibility in how projects are delivered

Collaborative delivery provides insight into construction markets.

Design-build provides single-point accountability and risk allocation.

Planning provides a roadmap that can be used when timing is right
