

Gary Koons

Gary is a Water Resource Planner for the Kansas Water Office. He graduated from Kansas State University where he studied natural resource management, and fluvial geomorphology through both the department of Geography, and Natural Resources & Environmental Sciences (NRES). His research focused on surface water security in regards to quality and quantity through the use of ecological mitigation.

Gary was raised in Canyon, Texas immersed in beef production, and water appreciation. Prior to joining the Kansas Water Office, he worked in construction and as an erosion control specialist for D.O.D. and D.H.S. projects.
