

Josh Olson

Josh is a Hydrogeologist and Water Resource Planner for the Kansas Water Office. He is involved with projects on a variety of water supply topics, including water injection dredging and the recycling of produced water.

Josh earned a bachelor's degree from the University of Wisconsin – Eau Claire with a comprehensive major in geology, hydrogeology and water chemistry. He then attended the University of Wisconsin – Madison, earning master's degrees in hydrogeology and water resources management. Prior to joining the KWO, Josh spent a year in environmental consulting. His interest in Kansas water management developed during a summer geohydrology assistantship with the Kansas Geological Survey as an undergraduate, and he remains committed to meeting water supply needs through effective management and planning.
