(cc) = Core Category

The largest planning region in the state located in northeast Kansas.

Size: 9,114 sq miles

Precipitation: Yearly average of 34 inches

Baker Wetlands, Douglas County, Kansas

CURRENT FOCUS AREA

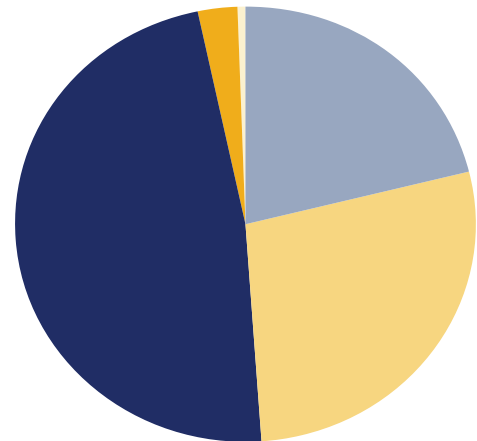

The Kansas RAC focuses on reservoir sedimentation and harmful algal blooms. We proposed a model, the Kansas Basin Watershed Management System, to streamline the process and increase coordination among agencies. The goal is a single science-based, watershed prioritization system leveraging existing programs to selectively target and fund projects.

Tuttle Creek Lake, Riley County, Kansas

WATER SUPPLY & USAGE

Groundwater and surface water are equally used in this region.

- Irrigation 28%
- Municipal 48%
- Industry 21%
- Recreation 3%
- Stockwater <1%
