CURRENT FOCUS AREA

Prolonging water supply in John Redmond Reservoir through sedimentation reduction. Practices such as no-till, cover crops, filter strips and streambank stabilization, along with education efforts, are important in achieving this goal. Studies of reducing Marion Reservoir’s algal bloom frequency will be done.

Neosho River, Streambank Stabilization Site

Regional Planning Area spanning through southeast and east central Kansas.

Size: 6,243 sq miles

Precipitation: Yearly average of 30-42 inches W-SE

John Redmond Reservoir, Coffey County, Kansas

WATER SUPPLY & USAGE

Surface water accounts for the majority of supply in the region. There are three federal reservoirs: Marion Reservoir, Council Grove Lake, and John Redmond Reservoir.
